DISCLAIMER

INTERNATIONAL QHSE STANDARDS

The International QHSE Standards which will apply to goods and services for the Mozambique LNG Project can be broadly classified as follows. Where there is a National Standard equivalent, it is also noted:

- International Organization for Standardization (ISO) – an independent, non-governmental international organization whose membership is comprised of the foremost standards organizations in member countries. Through their members, ISO develops standards and policies which are recognized around the world. The applicable ISO Standards that CONTRACTOR stipulate include:
 - o ISO 9001 – Quality Management (or National Standard NM ISO 9001: 2015)
 - o ISO 14001 – Environmental Management (Or National Standard NM ISO 14001: 2015)
 - o ISO 45001 – Occupational Health and Safety Management
 - o ISO 6743 – Lubricants, industrial oils and related products
- International Electrotechnical Commission (IEC) – an international standards organization that prepares and publishes International Standards for all electrical, electronic and related technologies. Some locally manufactured products that have been certified to the National Standard equivalent may be considered
- CE (European Conformity) Marking – indicates conformity with health, safety and environmental protection standards for products that are manufactured in, or designed to be sold in the European Economic Area
- American National Standards Institute (ANSI) – coordinates and develops technology standards in the US and is the US member of ISO. Usually applies to goods manufactured in or designed to be sold in the US
- International Safety Equipment Association – is a trade association of manufacturers of personal protective equipment and technologies and an ANSI accredited standards development organization
- ASTM International – is a standards organization which publishes voluntary standards. Focussed mainly on metals, construction, petroleum and consumer products
- Codex Alimentarius – a joint intergovernmental body of the Food and Agriculture Organization of the United Nations (FAO) and the World Health Organization (WHO) responsible for the development of International Food Standards. National Standards that are considered to be equivalent to Codex Standards are acceptable
- EN: European Standards are a set of voluntary standards developed by the European Standardization Organizations (CEN, CENELEC and STSI) and adopted by the National Standards Organizations in 34 European Countries. Whilst the EN Standards are voluntary, they are often stipulated by Law and therefore become mandatory. The EN Standards cover commodities such as Chemicals, PPE, Low Voltage Electronics, Measuring Instruments. Some locally manufactured products that have been certified to the National Standard equivalent may be considered
