

Notice of Public Consultation
RESETTLEMENT SITE DESIGN
CONCEPT HOUSING AND VILLAGE MODELS
HOST COMMUNITY INTEGRATION

The Mozambique Gas Development Project proposes to develop natural gas resources discovered in Offshore Areas 1 and 4 in the Rovuma Basin, off the coast of the Cabo Delgado Province in northern Mozambique. The co-proponents of the Project are Anadarko Moçambique Área 1, Lda (Anadarko) and Eni East Africa S.p.A (eni). Anadarko and eni are coordinating the development, construction and operation of a Liquefied Natural Gas (LNG) Park to process natural gas for export to international markets.

To enable the development of the Mozambique Gas Development Project, a resettlement process needs to be undertaken on the Afungi Peninsula in the district of Palma, the site where the Project intends to construct the LNG Park.

In compliance with Mozambican Law (Decree no. 31 of 08 August 2012) and international best practice standards and guidelines, the Project is preparing a Resettlement Plan. A consortium of Mozambican and international companies have been contracted to conduct studies in order to develop the Resettlement Plan. Decree no. 31 of 08 August 2012 requires the Project to convene 4 public meetings to inform interested parties of the resettlement process, allow opportunity for comment, questions, concerns and suggestions to be raised, and to consider all stakeholder input during the development of the Resettlement Plan.

The first series of public meetings were convened in July 2014. The Project would like to thank all stakeholders who participated. **The Project would like to invite you to the second series of public meetings to discuss the resettlement site design, concept housing and village models, and integration of resettled villages with host communities.** The public meetings will be convened on the following dates and at the following venues:

Venue	Date	Time
Senga Village Meeting Place	11 August	09:00-12:00
Maganja Village Meeting Place	12 August	09:00-12:00
Quitupo Village Meeting Place	13 August	09:00-12:00
Palma, Consultative Council Room	14 August	09:00-12:00

Interested parties are invited to participate.

Project information documentation can be obtained at www.mzlng.com or at the Anadarko office.

Should you have any questions regarding the meetings, please contact:
