A once in a generation opportunity

Africa’s largest project—the Mozambique LNG Project—will directly benefit the people of Mozambique for many generations to come.

It’s Mozambique’s turn
Massive discoveries of natural gas have the potential to transform Mozambique, enabling it to become one of the largest exporters of liquefied natural gas (LNG) in the world.

What is LNG?
LNG, or liquefied natural gas, is natural gas converted into a liquid by cooling. This process reduces its volume and enables natural gas to be transported around the world to customers seeking cleaner-energy alternatives.

Transforming Mozambique for the future
A recent report by Standard Bank finds the Mozambique LNG Project will boost employment, expand air, ports and road infrastructure, improve water and electrical infrastructure and expand access to education and health services in local communities.

Potential benefits by 2035

15,000 Direct jobs

685,000 Indirect jobs

U.S. $39 billion to Mozambican economy

Transport infrastructure including air, roads and ports

Opportunities for small- and medium-size businesses

Cleaner energy from Mozambique to the world
